## For productivity apps

**\$1499**

- Full app review
- Highlights important features
- Highlights potential improvements
- Demonstrates how app works
- Highlights who needs your app
- Contrasts advantages & disadvantages of using app

**\$599**

- Review of new updates
- Highlights what has changed in app
- Demonstrates how the new features work
- General commentary on the update

## Consultation

Based on the latest trends we:

- suggest ways you can improve the user experience in your app.
- advise on the features and functions to add to your app; don't lag behind your competition. Know what's trending and why it's trending.

Analysis of your app is done prior to the session. A consultation session is 1hr long on a phone call.

## Why work with us?

We are an online brand dedicated to connect developers with users who need their apps. With millions of apps on the market, it's difficult to stand out. We can help you showcase your app's greatest features to the right audience.

One shoutout doesn't make a successful advertising campaign. That is why we have packages starting from 5 shoutouts. Each shoutout will highlight a feature you feel makes your app stand out in its category. We will do quick demos on how and why a particular feature is something users want in their lives.

One shoutout costs \$349, we offer 20% discount for 5-9 shoutouts, 30% off 10-14 shoutouts and 45% for 15 or more shoutout campaigns.

If you have a productivity productivity app, we can do a full dedicated review of it. Our reviews are objective and honest. We believe users can make the best decisions when purchasing apps when they know the pros and cons of using an app. Our honest reviews also give you insight into how you can improve your app in future updates.

## How each sponsorship works

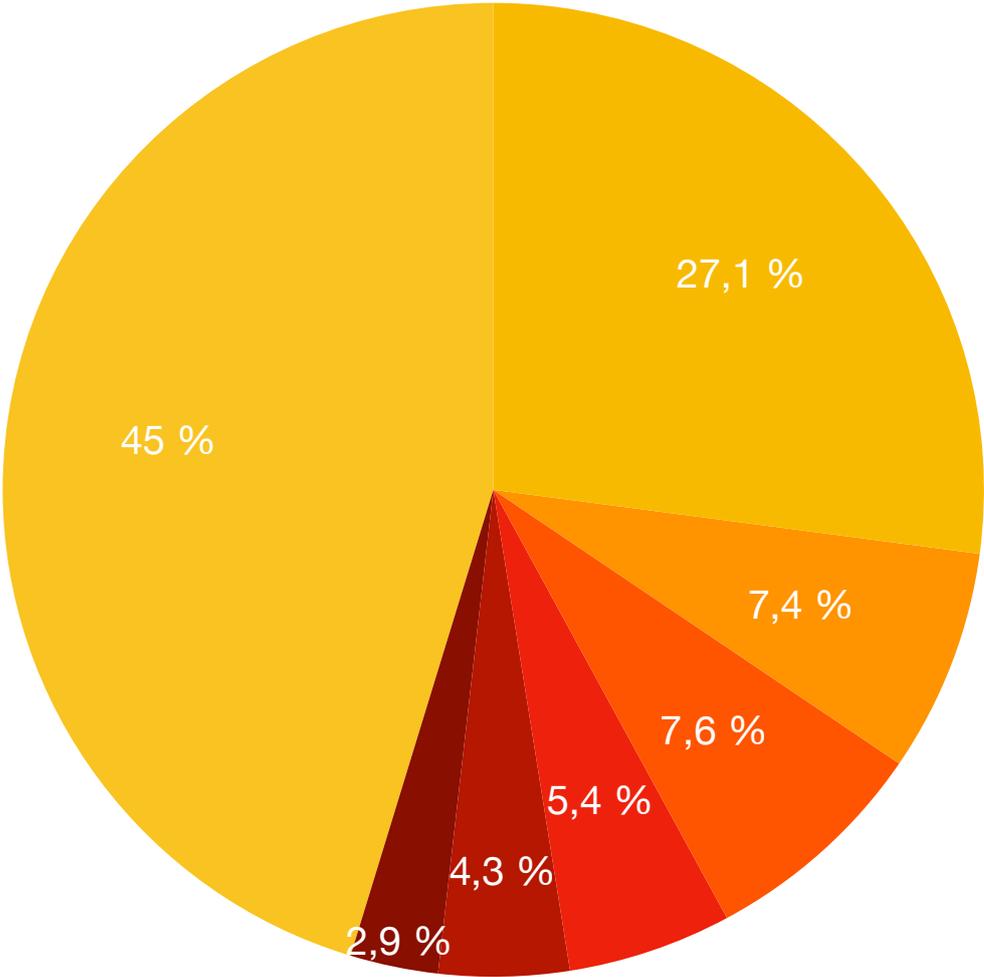

1. We need free access to your app/product. For full reviews we need 2-3 weeks to study and use your app at length before reviewing it.
2. All projects commence only when payment has been received in full (even studying your app or service).
3. You can edit the script for the campaign or full review, before we create the video. We can't make changes to the video once it has been created. When editing the full review scripts please stick to correcting factual information only; not our evaluation of your app. All our reviews must remain objective and honest.
4. To track all our work and progress, we use Asana. We will invite you to the team's project and update you every step of the way during the production process.
